

Gold and Silver Highlights In Congress Chicago's Federal Reserve Bank Reviews Gold

A bill reducing silver content in U. S. coinage to about 300 fine and pegging the monetary value of silver at \$4 an ounce was introduced on February 25 by Senator Frank Church (D-Idaho). The measure, S.1297, was introduced for himself and for Senator Len B. Jordan (R-Idaho), and was first introduced in the House by Representative Compton I. White (D-Idaho).

Highlights of Senator Church's remarks include: "we have heard it said many times recently that the United States is in a silver crisis. This is no rhetorical exaggeration. Put quite simply, the crisis is this: the world uses 400 million ounces of silver per year, 250 million of it in the United States, but the world produces only slightly over 200 million ounces, 40 million of that in the United States. Thus, this country is producing only 17 percent of its annual demand.

While such a situation would seem to lead to spiraling prices, it presently does not, because the U. S. Treasury is selling off its silver reserves for \$1.29 an ounce. As a result, last year, between January 1964 and January 1965, the Treasury's silver stockpile dwindled from 1.53 billion ounces to 1.19 billion ounces—a loss of 340 million ounces, or 90 million ounces more than we used in the United States during that time, and nearly 9 times more than we produced.

Obviously, the price of silver is being held at an artificially low level. This has two effects.

First. It deprives silver producers of the price they could receive in an unsuppressed market. This discourages new exploration which, in turn, hinders the expansion of silver production, so clearly called for.

Second. The price situation encourages hoarding and speculation. In some places, our silver dollars are already being melted down. Once the price of silver breaks through its present ceiling, when the Treasury's stockpile is exhausted, our silver dollars and subsidiary coinage will be melted down for the silver content.

It is apparent that the first and second effects of this artificial price situation work, potentially, at cross purposes. Any solution must take account of this fact, and must cautiously deal with all ramifications of this delicate dilemma.

Certain things are evident. First. The coinage system must be

changed so that the intrinsic value of the silver in any coin will not come to exceed the face value of the coin itself. At the same time, we must undertake to preserve a precious metal coinage, with as much silver content as rising market prices will permit. Retaining silver in our coins befits the greatest commercial Nation of the world, and will help to guarantee continuing public confidence in our money.

Second. Since we presently pump more than \$3 billion in coins through vending machines each year, any change in silver content should guard against the sudden and ruinous obsolescence of these machines.

Finally, the United States should stop supplying one-half of the silver demand of the free world out of Treasury stocks, so that the silver bullion we still have left will remain available to fill our future coinage requirements."

Commenting on the provisions of S.1297, Senator Church stated: "This bill provides for the reduction of the silver content in coins. The silver dollar could be reduced from 371 grains to a minimum of 120, with a corresponding reduction in the silver content of subsidiary coins. This reduced minimum is low enough to insure a long-term supply of Treasury silver for minting purposes, and is still high enough to allow vending machines to operate without substantial change. The new coins would look, sound, and perform the same as the coins we now use.

Naturally, this reduction in silver content requires that the monetary value of silver be raised. The bill would set the new value at \$4 per fine troy ounce, when demanded as redemption for

silver certificates still outstanding."

On the advantages of this measure Senator Church had this to say: "Enactment of this bill will enable us to preserve our precious metal coinage. It will protect against the hoarding and melting of coins, regardless of such increase in the market price of silver as is likely to occur in the foreseeable future."

On the areas not covered by S. 1297, Senator Church remarked: "It might also be useful to specify some of the things the bill will not do.

It does not specify which alloy will be used with silver, how much coins will weigh, or how they shall be minted; therefore, it does not handcuff the Treasury Department.

It does not solve the current problem of scarcity of our subsidiary coins. This shortage is attributable to a rapid increase in the use of vending machines and the popularity of coin collecting as a hobby and it will not be relieved until the mints have completed their planned expansion and the needed additional coins have been put into circulation."

Gold cover removal

GOLD: By 74 yeas to 7 nays (motion to reconsider tabled), Senate passed without amendment and cleared for President H.R. 3818, to eliminate the requirement of Federal Reserve banks to maintain certain reserves in gold certificates against deposit liabilities, after rejecting two additional amendments as follows:

Mundt amendment providing for Government subsidy of the domestic gold-mining industry; and, by 22 yeas to 58 nays, Lausche amendment to declare congressional

policy of containing the existing requirement that Federal Reserve banks maintain reserves in gold certificates of not less than 25 percent against their notes in circulation. President Johnson has now signed the bill into law.

A timely and comprehensive study on gold, entitled "World sources and uses of gold" was just released by the Federal Reserve Bank of Chicago authored by Mr. George G. Kaufman a staff member of this institution.

Because of the unusual current interest in the subject, selected excerpts of this study are offered here:

Uncertainties in international financial conditions in the closing months of 1964, stemming primarily from the pound sterling crisis, probably prevented Western central banks from achieving a record increase in their gold holdings during the year. Official gold holdings of international institutions and Western central banks rose 705 million dollars in the first nine months of 1964 compared with 430 million in the same period in 1963 and only 325 million in all of 1962.

Purchases by official institutions account for only a portion of total purchases of new gold each year. The remainder is purchased either for use in industry and the arts or by private sources as a store of value and hedge against devaluation of national currencies. The distribution of gold among these purchasers is dependent, in large measure, upon changes in confidence in political and economic conditions both at home and abroad.

Changes in official gold holdings tend to move inversely with changes in private holdings. When international tensions are low, official gold holdings expand faster than private holdings. When confidence is disturbed by either the threat of war or serious deterioration in a major country's balance of payments, fear arises about the future value of national currencies and private sources tend to acquire the bulk of the new gold offered for sale. (Although private citizens and business firms in the United States and United Kingdom may not own or purchase gold other than for industrial, artistic and limited numismatic uses, residents of many other countries may do so.)

France's Hercules Dollar, The 'ECU', Returns

Collectors Interest Aroused By New French Mint Sets

By Christian F. Verbeke, F.R.N.S.

THE recent release of French mint sets, "f.d.c. sets" in international numismatic vernacular, has focused collectors attention on an otherwise sadly neglected area of numismatics in the United States — French coinage.

Collectors familiar with early British coinage have a better opportunity to familiarize themselves with the history of French coinage, as both subjects are sometimes interwoven. In general, however, the field is rather specialized and good modern references on French coinage in the English language are lacking.

The British currency divisions of £, s, d. themselves are directly related to the old French system. Indeed "L" (pound) also stands for livre (a pound of silver); "s" stands for a solidus, sol or sou in French, and "d," denarius, the Latin designation, found its equivalent in the French denier.

Early French and British minting processes often served as a mutual source of inspiration of both the Paris and London mints.

French mint engraver Nicholas Briot, appointed to the London Mint by Charles I in 1628, is well remembered for his efforts to re-introduce mechanized minting at the Tower. Through his ingenuity the London Mint adopted, at least for partial coinage production, the rolling mill, cutting press, and screw-stamping presses.

In 1815 King Louis XVIII of France was cut off from French mint installations by Napoleon's advancing troops. To pay the assisting British troops in the north-east of France, King Louis had to resort to the minting of "louis d'or" (20-Fr. pieces) at the London Mint, these coins, an exact reproduction of the 1814 20-Fr. piece, were dated 1815 however. Some 871,000 of these pieces were issued.

French inventor Gay Lussac perfected the volumetric or wet method of assaying, a process later, at least partially, adopted in England by Sir Austen, chemist and London mint assayer.

As recently as 1944, 1945, the London Mint has executed coinage for French West Africa (Afrique Occidentale Française).

It is interesting to note this coinage was not regularly authorized. To counteract the shortage of circulating medium in French West Africa, the Governor General approved the issuance of metallic currency. Under this authority 15 million pieces of 1-franc and 10 million pieces of 50-centimes were struck in aluminum bronze at the London Mint and circulated in Spring of 1945.

To the collector of British or Commonwealth coins thus, the extension to French coinage can be a logical step in an effort to broaden the general scope of a comprehensive collection. Already French crowns or "ecus" occupy a place of honor in collections of world crowns or dollar-sized coins.

The piastres de commerce of French Indo-China, now trouble-ridden Vietnam, are the equivalent of the U. S. or British trade dollars and belong in a collection of world trade coins.

Recent developments

France's decision to issue uncirculated specimen sets of its 1964 and 1965 coinage may be considered a serious attempt to bring French metallic currency into the numismatic spotlight. These sets were offered for sale at mid-year 1964 by the "Monnaie de Paris," the French Mint.

The 1964 series, housed in a customized vinyl pouch marked "Monnaie de Paris," comprises the seven coins struck in 1964: 5 Fr., 1 Fr., 0.50 Fr., 0.20 Fr., 0.10 Fr., 0.05 Fr., 0.01 Fr. The entire package in turn is lodged in a rectangular longitudinal felt-lined box marked on the cover:

Monnaie de Paris	(Mint of Paris)
Pieces "Fleurs de Coins"	Uncirculated Coins
Serie 1964	1964 Series
Exemplaires Numismatiques	Numismatic Specimens)

The container also features a French tri-colored ribbon flanked by a replica gold seal of the Paris Mint dated 1707. These sets were offered initially at \$4.00 postpaid of which the delivery began November 1, 1964, and is now virtually completed.

The 1965 series, housed in a similar case, but marked "1965," will in addition contain the newly minted 10-Fr. piece, a dollar sized coin, and the 0.50 Fr. coin is replaced by the so-called half franc. According to the original mint notice, the 1965 set will not contain the 0.05 Fr. denomination. Delivery of the 1965 set, originally offered at \$7.60, was expected to begin on February 1 and to close by April 30. At the time of this writing, seemingly no 1965 sets were yet received in the United States; by publication date, however, it is likely this set will be actively offered through regular commercial channels.

Perhaps a good indication of the

French Mint's intentions to actively participate in numismatic services to coin collectors is Director Pierre Dehay's statement: "later on, the Paris Mint will also offer for sale coins struck for the overseas Department and Territories of the French Republic, under conditions that will be specified subsequently." As yet no information has been received on the subject.

The acquisition of the 1964 and 1965 mint sets is a possible beginning for the neophyte's collection of French coins. Although the earlier ecus or crowns are in brisk demand by collectors of world crowns, their price is relatively modest compared to equivalent Canadian dollars or Commonwealth crowns.

Minor French coinage, from 1848 to date, is a virtually untouched field in the United States, and its acquisition is a relatively simple matter. Completion of a "type" collection of this period is both inexpensive and interesting. For the collector discouraged by high prices in other fields, this type of material might prove most rewarding and attractive as other avenues of collection become increasingly crowded.

General date Grading nomenclature

French	English
Flan Bruni	Proof
F. d. c. (Fleur de coin)	Unc.
Superbe	E.F.
Tres beau	V.F.
Beau	F.
T.b.c. (Tres bien conserve)	V.G.

The beginner collector

The first requirement, as in any other area of collecting, is of course familiarization with the

subject. Since the most accessible period of French coinage begins with the Second Republic, i.e. 1848 to date, Yeoman's Catalog of Modern World Coins is useful in the identification of periods and types. As a price guide the book has the usual limitations inherent to all generalizations, and the listed prices are to be construed as a most general guide-line, subject to numerous variations.

Some background reading on French currency can be acquired by the "Selections from the Numismatist, Modern Foreign Currency," published by Whitman. Wayte Raymond's monograph on French "ecus" is also recommended.

5 Francs 1848-

The American Numismatic Association publishes selected numismatic reprints of France and its Colonies — the subject is rather sketchily represented however. From this first level of collection, and on a very modest budget, a beginner collector should be able to complete most of the minor silver, nickel, bronze and aluminum "types"; this does not include the silver crowns (5-Fr.), gold and certain Vichy French State issues, i.e. Marshal Petain 5 Fr. 1941, and 10 and 20 centimes iron, 1944.

For the collector interested in a more comprehensive study of French coinage, an excellent book has just been published in France by E. Bourgey. The work is profusely illustrated and uses a systematic cataloging treatment of a depth rarely encountered in U.S. publications. Even if equipped with a very limited knowledge of French, the collector will find the work excellent for identification and attribution purposes. Its presentation is somewhat similar to Wilson Peck's "English copper, tin and bronze coins in the British Museum." The new book is entitled "Histoire Monetaire et Numismatique Contemporaine" (1790-1848) Vol. 1 by Jean Mazard, also the author of the standard reference on coins of the French Colonies. Volume II by Mazard soon to follow, will cover French coinage from 1848 to date and should prove the ultimate and definitive reference in the field. The Histoire Monetaire is available from E. Bourgey, 7 rue Drouot, Paris 9, France, also an excellent source for earlier works on French numismatics.

The field of French coins remains wide open and affords considerable opportunities to both beginner and advanced collector of foreign coins alike.

FRENCH PROOF SETS

Year	No. of coins	Mint	Mintage	Recent Price
1878	5	Paris	unknown	\$140.00
1889	4	Paris	100	\$800.00
1897	5	Paris	unknown	\$145.00
1898	8	Paris	unknown	\$160.00
1950	3	Paris	unknown	\$ 32.50
1950 (*1)	7	Paris	unknown	\$ 55.00
1964 (*2)	7	Paris	unknown	\$ 7.50
1965 (*2)	7	Paris	unknown	\$ 11.00

Notes:

(*1) 7-coin set includes 4 patterns of 20-Fr. piece.

(*2) Sets of 1964 and 1965 are properly speaking f.d.c. or select uncirculated coins.

Caution should be exercised in the acquisition of French proofs i.e. Flan bruni, or essais (patterns) and pieforts (patterns struck on extra-thick planchets) as rumors of possible restrikes or later-date strikes have persistently circulated. The latter applies particularly to coins of the French Colonies. Purchase only from dealers willing to UNCONDITIONALLY guarantee authenticity and origin.

Great Britain Proofs

(Continued from last week)

1951 Proof Set

Comprises the farthing, halfpenny, penny, three-pence, sixpence, Scottish shilling, English florin, half crown and crown. Issued for the Festival of Britain.

The Royal Mint report of 1951 notes: "In further commemorating of the Festival, specimen sets of ten Proof coins, comprising all denominations from the crown to the farthing were issued in cardboard cases at 1 Pound per set.

Coins of Proof standard cannot be rapidly produced in great numbers, and throughout the period of the Exhibition, supplies both of Crowns and of sets were considerably below demand. Eventually, owing to the considerable pressure upon the Mint for coins for normal circulation, the (Proof Set) issue was limited to 20,000 sets.

The specimen sets and five shilling pieces were sold at a Pavillion specially built for the Royal Mint in the Homes and Gardens section at the South Bank Exhibition. At this point, 1,144,000 five shilling pieces (crowns) and 9,378 specimen sets were sold.

Queen Elizabeth 1953 Proof Set

The most recent complete British proof set which includes the farthing, halfpenny, penny,

three-pence, sixpence, Scottish shilling, English shilling, florin, halfcrown, and crown. Issued for the Queen's Coronation in 1953.

The price structure of English proof sets was recently analyzed by Messrs. Empire Coin Co. who made a comparative price study of English proof sets 1927-1953 versus the 1965 Canadian proof like set. Empire Coin Co. stated succinctly: "The following chart gives the mintages of each of the Proof Sets 1927 to 1953, the estimated number known today, and the mathematical compara-

tive value of each set in terms of the number known compared to 1965 Canadian Proof sets at \$8.00 each.

The numbers known of the various sets represent the results of extensive study and information gathered via numerous trips to England. The number known of the 1927 set is low as most of these went to non-collectors who purchased them for souvenirs at the Festival of Britain . . . accounting for a 25% reduction in the number known vs. the number minted. On the other hand, most 1950 and 1953 sets went to numismatists, resulting in the conservation today of nearly the entire mintages of those two dates."

"S" MINT COINS

INVESTORS SPECIALS
FROM THE WEST

With the San Francisco mint closed and the low issues from that mint, there is no doubt that "S" coins will continue on the way up in price and demand.

We continue to offer mixed date "S" rolls at attractive wholesale prices. No culls - scarce and choice condition coins are left in. We invite you to give us a try and order several rolls. Small or large, your patronage is always appreciated.

CHOICE RARE COINS

1793 AU CHAIN CENT

No chain cent of any variety which has appeared on the open market in recent years can come within a full grade of this razor-sharp specimen. I suspect this was the plate coin used by Whitman to illustrate the variety "with periods" in your current Redbook. Superb! Details on Request \$4250.00

1797 PROOF-LIKE UNC. LARGE CENT

A superb specimen of Early Americana. Beautiful beyond belief. (Ex Helfenstein). Details on request \$875.00

1814 MINT-RED UNC. LARGE CENT

Another superb Unc. coin. This type of large cent (Turban Head 1808 1814) is VERY RARE when Unc. or BU, and is almost impossible to locate. Details on request \$1150.00

1794 S-41 LARGE CENT

Second finest known specimen, strictly XF (many would call AU) Ex - Sloss \$495.00

1872 PROOF INDIAN CENT

From a recently auctioned renowned collection, where it was described as "Brilliant proof, superb iridescent toning." A Rare Coin \$475.00

1877 PROOF INDIAN CENTS

A brilliant mint red proof, beginning to fade to a beautiful deep iridescent. Choice and rare \$1375.00

1914-D BU CENT

A superb perfectly struck mint — red specimen just beginning to tone to dark red and chocolate. Exceptional and rare \$675.00

1873 TWO-CENT PROOF

Brilliant orange-red proof \$645.00

1877 SHIELD NICKEL PROOF

A choice brilliant proof specimen of this rare coin, which is of special interest because the coin shows evidence that the die had begun to shatter at the top \$995.00

1926-S BU NICKEL

There are two truly rare coins in a BU set of Buffalo nickels. The other one in the 1924-S. I have sold 2 of the 1924-S nickels for in excess of 3 times their \$250.00 Catalogue value, yet people continue to claim the 1926-S is rarer. This beautiful piece is quite attractively struck for a coin in the 1920's \$575.00

1916-D FROSTY BU DIME

A choice frosty BU specimen of a rare coin \$775.00

1821 GEM UNC. QUARTER

A superb, perfectly struck gem, beautiful beyond belief. Virtually no bag marks or blemishes of any sort mar this magnificent piece. I challenge any collector or dealer to duplicate this coin \$500.00

1916 GEM BU QUARTER

Unquestionably one of the finest and most perfect specimens in existances of this rare standing liberty quarter .. \$1095.00

1927-S BU QUARTER

An extremely rare coin of the standing liberty quarters. A well struck specimen for this series. \$550.00

2 Great Rarities - Calif. Gold

In all my experience as a coin dealer, the round Calif. gold dollar ranks as a truly scarce coin. Almost every piece I have ever seen has been holed, soldered, looped, or just worn out. Friday I bought 2 proofs!!! Frankly, I'm flabbergasted! Any serious collector who seeks one of these coins and passes this opportunity because of price is simply displaying his ignorance.

No. 1 1871 ROUND CALIF. GOLD \$1.00

A brilliant proof specimen of Burnie No. 12 \$535.00

No. 2 1872 ROUND CALIF. GOLD \$1.00

An even sharper Proof specimen of the very rare Burnie No. 16.
Probably no specimen will appear in the next ten years \$625.00

BU DOLLAR SPECIAL

During several years in the dollar business, I have at most had a handful each of BU 1883-S and 1884-S dollars. I think they are very scarce. Last week I bought one roll each of these dates, strictly BU. Better act while they are available!

1883-S \$1.00	BU \$21.00	BU select \$26.50
1884-S \$1.00	BU 27.50	BU select 35.00

RARE COINS

(Slade Enterprises, Inc.)

P.O. BOX 2368-B N. ORANGE AVE. ORLANDO, FLA.

STORE HOURS: 9:30-5:30 Tuesday thru Friday; Mondays 9:30-9:00; Saturday 9:30-1:00

Folks . . .

I've been given a rare treat this week. My father and mother have come to visit for the first time in several years. As a matter of fact, a year ago my father's health was so very poor that we really never expected him to be able to visit again, so you see this really is special.

In the interest of having some free time, we are repeating last week's large ad with only a few changes and additions. Incidentally, we were not crazy enough last week to purchase pages (2) and (12, 13, 14) for a 4-page ad. It seems that the printer transposed pages 2 and 11 when he ran the paper. Since I own a printing business, I can certainly understand what happened, and imagine some poor layout man is on bread and water this week. Danny Anderson of Mississippi Numismatic Exchange is the one who was really upset, however. He must not have liked my close company. If I had a cute girl-Friday like his, I'd want to be left alone also.

Enough of this nonsense. I have to sell coins for a living, and my wife, Virginia, likes to get me home on time for supper sometimes. All I have to do now is sign this thing and the ad is finished.

Best,

"Shotgun"

BUY — BU ROLLS — SELL Key Dates

Below are listed prices for certain popular rolls. I will always buy these dates of rolls, either one at a time or in large quantities. My prices are pretty firm, but occasionally subject to some minor fluctuation as the market changes.

All prices are for strictly BU rolls, of course. Inferior rolls are worth less money. Oh yes, I'm in the market to buy most other dates, of course.

SILVER DOLLARS

1895 PROOF DOLLARS

No. 1. A superb flawless brilliant gem proof. This specimen is as brilliant as the day it was struck, and totally free of all blemishes and hairlines of every sort. Truly immaculate.

\$5350.00

No. 2. A second specimen, absolutely uncirculated and totally free of wear. Unfortunately, some clod used an eraser or other mild abrasive to clean the coin, and the beautiful proof surface is quite badly hairlined. A considerable portion of the original proof surface remains, however, and there are no bag marks or other imperfections. Needless to say, the piece is unquestionably genuine.

\$3650.00

DOLLAR RARITIES

1893-S BU DOLLAR

Only once in my experience as a dealer have I seen an 1893-S dollar equal to or better than this, and it had been purchased from B. Max Mehl many years ago. This piece is from my personal set. It is a frosty BU coin, very nicely struck, with full sharp breast feathers and hair detail. Bag marks are at a very minimum, and those few are so fine and tiny as to go unnoticed. Your inspection is invited!

\$4950.00

1880 over 79-CC BU GEM DOLLAR

This rare piece is outstanding in two respects. First, it is the finest, most perfect, blemish-free BU 1880-CC dollar I have ever seen. Second, it is the sharpest example of an over-date I have seen. The entire figure 7 is visible beneath the figure 8, and parts of the figure 9 can be detected in 3 places beneath the figure 0. Magnifique!

\$450.00

1957 and 1958 CANADIAN BU NICKELS

Compare Canadian BU Nickel Rolls

DATE	Mintage In Millions	Price
1953	17	240.00
1954	7	525.00
1955	5	255.00
1956	9	155.00
1957	7	170.00
1958	7	160.00

The 1957 and 1958 nickels are lower in mintage than the 1953 nickels which are much higher in price.

The 1957 and 1958 nickels at this moment according to their mintages have the price potential of \$525.00 per roll. (The 1954 nickel roll with the same mintage of 7 Million sells for \$525.00)

The 1957 and 1958 nickels are extremely common in circulated condition. We estimate better than 98% of each date is in circulation which would leave only 2% or 140,000 coins of each in Uncirculated condition.

The 1957 and 1958 nickels are extremely scarce in Uncirculated condition and the demand is much greater than the available supply.

The 1957 and 1958 nickels along with the 1954 nickels has been the key dates in the first Queen Elizabeth series and this series has been completed in 1964. (A new design with a more mature portrait of Queen Elizabeth is being minted in 1965). When the U.S. Franklin Half Dollar series was completed in 1963 the 1955 Franklin Half Dollar soared from \$20.00 per roll to its present price of \$225.00 per roll.

The 1957 and 1958 nickels in our opinion will sell for at least \$550.00 and \$500.00 per roll within two years, and \$1100.00 and \$1000.00 per roll in the next 4 years. We offer CHOICE Brilliant Uncirculated rolls of 1957 Canadian nickels at \$170.00 per roll and choice Brilliant Uncirculated rolls of 1958 Canadian nickels at \$160.00 per roll. All rolls shipped in Tomkin plastic tubes (postpaid and insured). 5 day return if you are not completely satisfied.

Space City Averages:

HOW THEY ARE OBTAINED

With close to 1,500 separate statistics appearing each week in PACE, a need exists to express this information in graphic form for busy readers.

We are currently charting eight different coin series each week as you see below. These charts are based on Space City Averages, an arbitrarily chosen group of rolls which we feel are representative of the total for that series.

To be included in the Space City Averages rolls are chosen on the basis of three factors: (1) their trading is constant, (2) they are widely held, and (3) they are indicative of the series.

It is obvious infrequently traded items, closely held items, and extremes in the series would not serve this purpose.

Each week the statistical staff of PACE prepares these averages from the information obtained on The United States Coin Exchange transactions.

The amount expressed in the Space City averages is the total market bid prices for the rolls included in the averages. This is a dollar figure and is compared with previous week, month, and year figures for analysis.

The high and low for 1964 is also shown.

MARKET SUMMARY

March 10, 1965

By Richard Peyev

FRANKLIN half dollars for the third week in a row posted a new yearly high of \$2,238.00. Weekly gains have been four, six, and seven dollars in that order. Franklin half dollars were followed closely by Washington quarters which for the second week in succession recorded a new yearly high of \$1,012.00. Last week their gain was one dollar. This week they gained three dollars more. Morgan dollars have remained unchanged for two weeks running. The four advances and three declines did not affect the averages. Peace dollars found a new low of \$2,115.00 due to a \$15.00 decline.

Lincoln cents this week showed 12 declines and 10 advances with 63 issues remaining unchanged. The weekly average also slipping one dollar. The main declines were the 1939-D losing ten dollars and the 1960-P small date dropping five dollars more. The volume was comparatively heavy with many offers to sell. The advances posted are firm based on transactions not just offers to buy. Most advances were at the three dollar level.

Jefferson nickels moved upward \$12.00 showing a high of \$2,767.00. The 1951-S was the big gainer with ten dollars followed by three other three dollar increases. Last week this series lost nine dollars. Volume was light with most of the traffic from 1946 forward. Most bids were on rolls dated from 1942 to 1949. Late date material could be found in

large quantity at very reasonable prices. From 1959 forward the ask prices varied from fifty cents to one dollar.

Roosevelt dimes lost four dollars due mainly to lack of trading. There were two advances and eight declines none of which were for more than two dollars. Many offers to sell early rolls were recorded, but not many prices were affected. The 1955-D and the 1955-S rolls slipped one dollar each.

Washington quarters received almost no attention this week posting four gains and seven declines. The four gains happened to be in the right places and this series moved up three dollars to a new yearly high of \$1,012.00. Unlike dimes nearly all offers to buy or sell in this series affected the price.

Franklin half dollars scored seven to two advances over de-

clines. Their new yearly high is \$2,238.00 due to a seven dollar gain. The 1948-D roll led with a five dollar gain. All other changes were two dollars or less. Volume was heavy with many offers to buy. Most transactions consisted of small quantities.

Both silver dollar series recorded more activity this week than has been noticed in some time. No major changes occurred in the Morgan series except a seven dollar gain by the 1902-P roll. The thirty and forty dollar rolls were trading real well. Peace dollars started off with a fifteen dollar gain by the 1921-P roll but ended up losing ten dollars apiece on the 1923-D and 1934-P rolls. A five dollar decline was recorded by the 1926-S issue. The score five to one declines over advances with 17 issues remaining unchanged.

Proof-Sets moved upward one

dollar and fifty cents. Only four issues changed the largest being a five dollar gain by the 1938 set. The 1964 set fell another fifty cents this week. The 1953 and 1955 sets each gained one dollar.

Circulated nickels moved down slightly. It seems that most dealers have an ample supply of average circulated Jefferson nickels. This, however, is not the case with Washington quarters. The buy prices have been forced upward due to dealers requesting large quantities and offering to pay a little more than the average bear. 1932-D quarters led the pack with a \$200.00 gain followed closely by the 1932-P roll with a \$25.00 gain. Seven issues in all moved upward for a net gain of \$236.00. Last week the net gain of this series was \$300.00.

Canadian Proof-Like sets took a turn for the better this week with the 1957 and 1958 sets gaining three dollars each. We listed for the first time this week 1965 sets as they are being traded rather actively. There will more than likely be a large number of price changes in this item until the distribution of this set locates the demand.

The Market Opinion

Since the first of the year the coin market in general has been on the rise. This rise has been slow and steady based for the most part on actual transactions rather than offers to buy and sell. Steady growth in volume and price means good things ahead for numismatics in 1965.

Using Coins Listed In Space City Averages

HALF DOLLARS

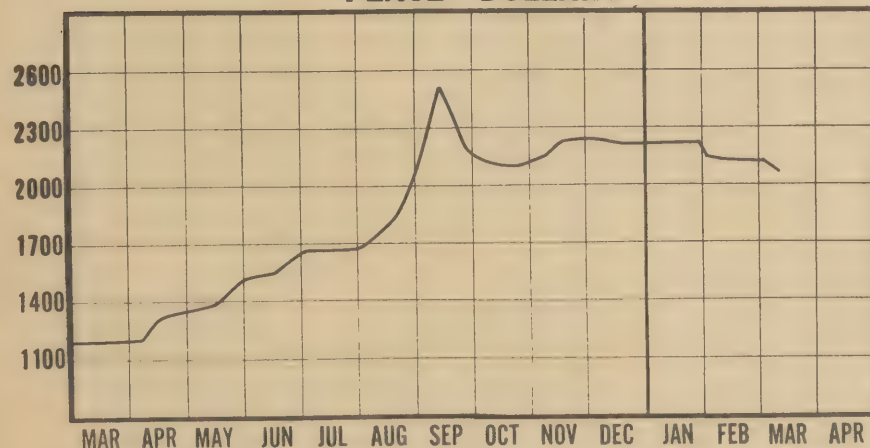

The following BU rolls were used in the calculation of the Franklin half dollar averages: 1948-P, 1948-D, 1949-P, 1949-D, 1949-S, 1950-P, 1950-D, 1952-S, 1953-S, 1954-S, 1956-P, 1957-P, 1958-P, 1959-P, 1960-P.

MORGAN DOLLARS

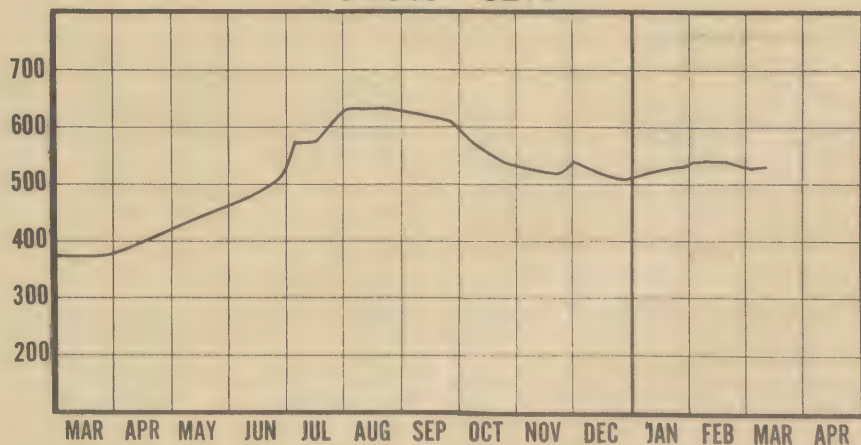

The following BU rolls were used in the calculation of the Morgan dollar averages: 1878-CC, 1879-O, 1882-CC, 1883-CC, 1883-S, 1885-S, 1890-O, 1894-O, 1897-P, 1897-O, 1897-S, 1898-P, 1901-P.

PEACE DOLLARS

The following BU rolls were used in the calculation of the Peace dollar averages: 1922-S, 1923-D, 1926-P, 1926-D, 1926-S, 1928-S, 1934-D.

PROOF SETS

All proof sets from 1950 to date, excluding the 1960 small date set, go to make up the proof set averages. The current year's set is added to the average on April first.

United States Coin Exchange Transactions

BU Roll Prices as of Wednesday, March 10, 1965

These bid and asked prices, from the United States Coin Exchange Inc., do not necessarily represent actual transactions. They are a guide to the range within which these coins

could have been sold (indicated by the "bid") or bought (indicated by the "asked") at the time of compilation. Price changes are obtained by comparison of weekly bid prices.

Prices are wholesale quotations compiled from the United States Coin Exchange teletype system which serves 285 coin dealers across the country.
